

Nucleophilic Dearomatizing (D_NAr) Reactions of Aromatic C,H-Systems. A Mature Paradigm in Organic Synthesis

Fernando López Ortiz,* María José Iglesias, Ignacio Fernández, Carmen M. Andújar Sánchez, and Gloria Ruiz Gómez

Área de Química Orgánica, Universidad de Almería, Carretera de Sacramento s/n, 04120 Almería, Spain

Received January 30, 2006

Contents

1. Introduction	1580	11.2. Reactions with Grignard Reagents	1616
2. Unsubstituted Aromatic Hydrocarbons	1582	11.3. Reactions with Organolithium Reagents	1619
2.1. Naphthalene, Anthracene, and Phenanthrene	1582	12. Oxazolines	1620
2.1.1. Reactions with Hydride Transfer Agents	1582	12.1. Reactions with Carbon Nucleophiles	1621
2.1.2. Reactions with Carbon Nucleophiles	1583	12.2. Reactions with Nitrogen Nucleophiles	1625
2.1.3. Reactions with Heteroatom Nucleophiles	1587	12.3. Reactions with Silicon Nucleophiles	1627
2.1.4. Mechanistic Studies of the Nucleophilic Dearomatizing Alkylation	1587	13. Oxazolidines	1628
2.2. Polycyclic Aromatic Hydrocarbons with More than Three Rings	1589	14. Aromatic Rings Linked to a Nitrogen Atom	1629
3. Benzylic Systems	1589	14.1. Nitro Compounds	1629
3.1. Anthrylmethyl Halides and Alcohols	1590	14.1.1. Reactions with Hydride Transfer Agents	1631
3.1.1. Reactions with Hydride Transfer Agents	1590	14.1.2. Reactions with Nonstabilized Carbanions	1635
3.1.2. Reactions with Carbon Nucleophiles	1591	14.1.3. Reactions with Stabilized Carbanions	1638
3.1.3. Reactions with Heteroatomic Nucleophiles	1593	14.1.4. Reactions with Oxygen Nucleophiles	1648
3.2. Anthrylmethyl Ammonium Salts	1594	14.1.5. Reactions with Nitrogen Nucleophiles	1651
3.3. Anthrylmethyl Hexachloroantimonates	1597	14.1.6. Reactions with Phosphorus Nucleophiles	1652
3.4. Chloromethylbenzenes and Chloromethylnaphthalenes	1597	14.2. Diazo Compounds	1653
4. Aryl Ethers	1597	14.3. Triazo Compounds	1654
5. Aldehydes and Ketones	1598	15. Aromatic Rings Linked to a Phosphorus Atom	1655
5.1. Hindered Carbonyl Functional Groups	1598	15.1. Phosponium Salts	1656
5.2. Bulky Lewis Acid Catalysts	1599	15.2. Phosphine Oxides	1656
5.3. Polycyclic Compounds	1600	15.3. Dearomatizing Anionic Cyclization	1656
6. Imines	1601	15.3.1. Phosphorus Ylides	1656
7. Carboxylic Acids	1604	15.3.2. Phosponamides	1656
8. Carboxylic Esters	1606	15.3.3. Phosphinamides	1657
8.1. Hindered Esters	1606	15.3.4. Mechanism of the Dearomatizing Anionic Cyclization	1659
8.2. Bulky Lewis Acid Catalysts	1609	16. Aromatic Rings Linked to a Silicon Atom	1662
8.3. Bulky Nucleophiles	1609	17. Aromatic Rings Linked to a Sulfur Atom	1663
9. Amides	1609	17.1. Sulfones	1663
9.1. Intermolecular Nucleophilic Dearomatizing Reactions	1609	17.2. Sulfonamides	1668
9.2. Intramolecular Nucleophilic Dearomatizing Reactions	1610	18. Miscellaneous Nucleophilic Dearomatizing Reactions	1669
9.3. Asymmetric Dearomatizing Anionic Cyclization	1612	19. Synthetic Applications of Nucleophilic Dearomatizing Reactions	1670
9.3.1. Chiral Aromatic Carboxamides	1612	19.1. Synthesis of Heterocyclic Compounds	1670
9.3.2. Enantioselective Deprotonation with Chiral Bases	1613	19.2. Synthetic Applications of the Dearomatization of Naphthyloxazolines	1676
10. Acid Halides	1615	20. Summary and Outlook	1678
11. Nitriles	1616	21. Note Added in Proof	1680
11.1. Reactions with Hydride Transfer Agents	1616	22. Abbreviations	1685
		23. Acknowledgment	1686
		24. References	1686

1. Introduction

Organic synthesis is a pivotal part of organic chemistry having as its main objectives the preparation of new
